

Comprehensive Access Kit

Easy and safe endodontic procedures

Safe access into the root canal is imperative for any successful root canal treatment. That is why MEISINGER created the Comprehensive Access Kit, a carefully curated selection of diamond and tungsten carbide instruments necessary for a safe and predictable endodontic access preparation. This kit

provides all the burs needed to obtain straight line access into the canal through different materials such as zirconia, PFMs, and enamel. Conveniently organized in an autoclavable bur block, this kit is essential for any root canal treatment.

ENDO1

At a glance

- Obtain a straight line access to the root canal
- Remove the roof of the pulp chamber
- Cut through zirconia, PFMs, and enamel
- Expand and flare axial walls
- Uncover hidden orifices
