

Occlu Twist Polishers

Precise polishing of the occlusal surface

The new Occlu Twist polishers from MEISINGER impress with their effective and intuitive application. The exceptional shape allows for efficient polishing of the occlusal surface and achieves flawless results even in deep fissures. This two-step polishing system produces high gloss results on all composite materials. Even hybrid composites, micro-filled composites and high-density restorative materials can be easily processed with the Occlu Twist polishers. Occlu Twist polishers are applicable without polishing paste and achieve brilliant polishing results in a very short processing time.

Made in
Germany

At a glance

- Specifically for occlusal surfaces
- Reaches deep fissures
