

Master-Mill

Surgical Bone Mill – used by Prof. Istvan Urban

The Bone Management® Master-Mill is a surgical bone mill used for crushing autologous bone blocks and thus preserving small autologous bone chips. With the help of these bone chips, bone defects of all shapes can be optimally filled. The individual

components of the Master-Mill are made of high quality, surgical stainless steel. All parts feature an optimal fit and a stable geometry, allowing the Master-Mill to be easy to handle with ease of assembly and intuitive use.

At a glance

- Crushing of autologous bone blocks
- Augmentation of bone defects of all shapes
- Individual components made of high quality, surgical stainless steel
- Stable geometry
- Easy and intuitive handling
